

The Latch-On-Pot Trellis can be made into two different shapes

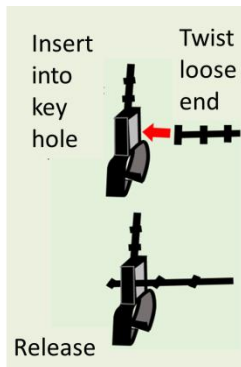

Shape #1 The Swirl shaped trellis

The "Swirl" shape is formed by using a pot where the 4 tension strands attach over the rim of the pot.

- the utility handle has 4 tension strands that attach to a pot with 4 side clips.
- each trellis strand is then inserted through the keyhole in the respective tension strand.

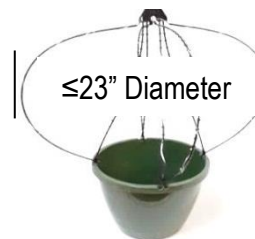

≤19" Diameter

Shape #2 The Orb shaped Trellis

The "Orb" or bulb shape is formed by using a pot where the 4 tension strands attach into the rim of the pot with 4 in0-rim clips.

- the utility handle has 4 tension strands that attach to a pot with 4 in0-rim clips.
- each trellis strand is then inserted through the keyhole in the respective tension strand.

≤23" Diameter
